DETAILED ACTION

Election/Restrictions

1. Claims 15-22 and 31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Specification

2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show contact portions 212, page 15, line 3, as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

4. Claims 1-7, 10-14, 23, 24 and 27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Palm.

Regarding claims 7, 10-12 and 13, Palm discloses (Fig. 4) the invention including a first end 56, a second end 54 and a retainer member (the inside wall of the hole 28) supported by the housing and defining a channel/slot 28.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 8-9, 25-26, 28-29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palm.

Palm discloses the invention substantially as claimed except for a first recess, a second recess and a second lever formed of a metallic material. However, the examiner takes official notice that the use of a first recess, a second recess and a second lever formed of a metallic material ^{are} ~~is~~ old and well known in the art for the purpose of increasing the stiffness in the lever. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Palm's lever by providing the first recess, the second recess and the second lever formed of a metallic material in order to obtain an increase of stiffness in the lever.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. J. B. Mejia, Getts, Gerritsen, Jr. and Roe are cited to show related device.
